**DOWFROST™ Heat Transfer Fluid
Food and Drug Administration (FDA) Compliance**

DOWFROST™ heat transfer fluid is made from USP/EP grade propylene glycol and food grade dipotassium phosphate. These two ingredients are generally recognized by the FDA as safe under parts 184 and 182 of the CFR Title 21 Food Additive Regulations. The regulation for propylene glycol is 21 CFR 184.1666 while 21 CFR 182.6285 is for dipotassium phosphate. The propylene glycol and dipotassium phosphate used in DOWFROST™ heat transfer fluid meet the requirements of these regulations.

Based on this regulatory status and the long history of satisfactory use, we certify that this product is acceptable for use as a heat transfer fluid with food processing equipment where there is possibility of incidental food contact.

If you have any questions or if you require additional information such as proof of registration with NSF International please contact us.

Sincerely,

Kevin Connor
