

GLY-PRO™

GLYCOL SALES AUSTRALIA

Descaler

MILD ACID-BASED DESCALANT AND CLEANER

This powerful cleaner immediately dissolves scale and hard water deposits, making it a one-step solution for effective and easy cleaning. It quickly removes oil and grease residue while remaining safe for most HVAC materials. The non-foaming formula restores system heat transfer efficiency and efficient system flow, leading to reduced energy consumption. Best of all, no dismantling is required, and regular use extends the lifespan of system pipework and components.

FEATURES

- Immediately dissolves scale and hard water deposits
- One step cleaning - effective and easy to use
- Removes oil and grease residue
- Safe on most HVAC materials
- Non-foaming

DESCRIPTION AND USAGE

GLY-PRO™ Descaler is a high-performance cleaning fluid designed to effectively remove scale build-up and hard water contaminants from internal pipework commonly used in HVAC and secondary refrigeration systems.

GLY-PRO™ Descaler chemically reacts with the mineral deposits and metallic corrosion immediately dissolving and allowing them to be flushed out.

GLY-PRO™ Descaler is a specially formulated cleaning chelant that restores system heat transfer efficiency whilst reducing energy

KEY BENEFITS

- Restores system heat transfer efficiency
- Reduces system energy consumption
- Restores efficient system flow
- No dismantling required
- Extends the lifespan of system pipeworks and components

consumption extending the lifespan of the system.

TECHNICAL DATA

SPEC	PROPERTIES
Colour	Clear to Yellow
pH	Approx 2-3
Specific Gravity	1.102

GLY-PRO™ Descaler is available in 18kg and 220kg drums.
